

Backyard Astronomy Course

If you would like to learn how to view the night sky with confidence, allowing you the freedom to stargaze in your own back garden, then the Backyard Astronomy Course from Solent Tuition is for you. Starting on Monday 9th January 2017.

Enjoy looking back through the lives of the greatest astronomers in history, as they revolutionised the physical sciences. Wonder at the majestic planets and their interesting moons during our tour of the Solar System. Get to grips with how the night sky is viewed, including an array of well known and not so well known constellations. Be dazzled by the sheer scale of the universe as we look deeper into the sky at some of the more distant objects. Couple this with some actual viewing sessions as well as a crash course in telescope operation, and you will have amassed the knowledge to join the ranks of amateur astronomers everywhere. Gain the knowledge you need to be a true backyard astronomer, and open up the world above your head.
