CLOCK REPAIR CLUB

Tuesday evenings 7pm - 9pm - 24th April 2018 - Summer Term

The clock repair club grew out of an adult education class and now meets in the school workshop on Tuesday evenings during term time. Members strip, repair, clean and re-assemble their own mechanical clock movements. The members have a wide range of skills, knowledge and expertise which they are willing to share with others. The club is also fortunate in having a qualified clock and watch repairer on hand to assist with advice particularly for those who are "beginners". You will need to bring a clock to work on along with some basic tools such as screwdrivers, tweezers, eye-glass, miniature pliers etc.

There is a small charge each term to cover running costs such as the hire of the workshop. For further information contact Kevin Stubbs 01794515715 or email: kevinstubbshbc@talktalk.net
